Door reverses are supplied matching as standard, except curved door reverses which have a white back.

Non-standard sizes are priced to next size up. Where no price is shown, these sizes are both regarded as being standard.

CONTOUR COLLECTION

THE INFRAME LOOK - FOR LESS

4 STUNNING INFRAME EFFECT RANGES

Instantly recognisable by its design, a classically created '*inframe*' kitchen conjures up images of time-served craftsmanship and exquisite carpentry. Traditionally, the term '*inframe*' refers to a kitchen door being inset within a fitted frame at the front of the kitchen carcase. This means that the door itself is smaller and opens within the frame. Our **CONTOUR COLLECTION** replicates this elegant look with subtle line detailing on the outer edges of each door, providing the illusion of authentic inframe cabinetry without the need for costly and labour intensive carpentry. This creates a timeless, elegant and desirable feature that brings a highly sought-after look to any kitchen space, and can add a significant amount of value to a home.

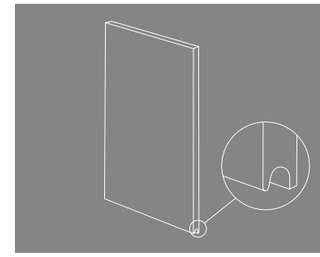
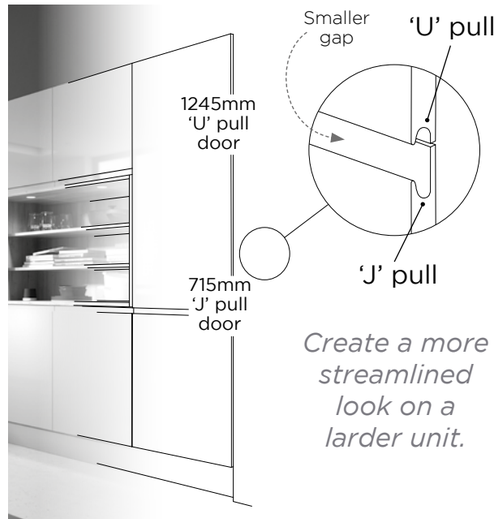
'U' PULL DOOR
Made to measure only

This door has a hidden 'U' pull handle which is different to the standard 'J' pull on Lucente. From the front it looks like a slab door and the design creates a smaller gap between the 1245mm and the 715mm doors on a larder unit.



'U' Pull Door



Create a more streamlined look on a larder unit.

TOPSLIDE INTERNAL DRAWER FITTINGS 83mm/160mm/224mm (h)

HOW TO CREATE AN INTERNAL DRAWER:
1. Choose a standard Topslide drawer (boxed or in component form), in 83mm, 160mm or 224mm height.
2. Instead of attaching a drawer front use the internal brackets and an internal fascia panel to create a complete drawer. 224mm internal drawers also require a front square rail. (Nb. Bottom set of side rails that come with the standard drawer not needed for the 224mm height.)

Made to measure vinyl bedroom door

GENERAL INFORMATION

Door sizes below 250mm high will have a drawer front design and horizontal grain as standard.

Above 250mm high will have a door design and vertical grain as standard.

Doors 1735mm and above with routed inner panels will have a mid rail to create a top and bottom panel. Exceptions to this rule are Millenium, which only have one tall panel and no mid rail is possible.

The maximum length is 2500mm for all routed items.

Non-standard doors less than 260mm wide, and drawer fronts less than 130mm high, will have no inside rout. The exception is the Kielder design where the minimum height and width is 283mm.

Door reverses are supplied matching as standard, except curved door reverses which have a white back.

Non-standard sizes are priced to next size up. Where no price is shown, these sizes are both regarded as being standard.

Alnwick, Ascot, Hampton, Matfen and Shaker designs + 20%. No surcharge applied to drawer fronts up to 282mm high.

Open frame doors +25%.

Fretted frames (Georgian style) + 50%.

CURVED DOORS

4. GOODS AND SPECIFICATION

4.1 Any Goods set out in the Supplier's literature (whether electronic or hard copy) may change at any time.

4.2 To the extent that the Goods are manufactured in accordance with a Specification supplied by the Customer, the Customer shall indemnify the Supplier against all liabilities, costs, expenses, damages and losses (including any direct, indirect or consequential losses, loss of profit, loss of reputation and all interest, penalties and legal and other professional costs and expenses) suffered or incurred by the Supplier in connection with any claim made against the Supplier for actual or alleged infringement of a third party's intellectual property rights arising out of or in connection with the Supplier's use of the Specification. This clause 4.2 shall survive termination of the Contract.

4.3 The Supplier reserves the right to amend the Specification if required by any applicable statutory or regulatory requirements.

4.4 The Customer shall ensure that all Goods are installed in accordance with the manufacturer's installation instructions. Any installation advice provided by or on behalf of the Supplier is done so free of charge and on an informal basis only without any warranties or guarantees. (a) ensure that the terms of the Order and any applicable Specification are complete and accurate;

(b) co-operate with the Supplier in all matters relating to the supply of the Goods;

(c) provide the Supplier, its employees, agents, consultants and sub-contractors with access to the Customer's premises, office accommodation and other facilities as reasonably required by the Supplier for the purposes of the Contract;

(d) provide the Supplier with such information and materials as the Supplier may reasonably require to supply the Goods and ensure that such information is accurate in all material respects.

(a) the Supplier shall without limiting its other rights or remedies have the right to suspend delivery of the Goods until the Customer remedies the Customer Default, and to rely on the Customer Default to relieve it from the performance of any of its obligations to the extent the Customer Default prevents or delays the Supplier's performance of any of its obligations;

(b) the Supplier shall not be liable for any costs or losses sustained or incurred by the Customer arising directly or indirectly from the Supplier's failure or delay to perform any of its obligations as set out in this clause 5.2; and

(a) each delivery of the Goods is accompanied by a despatch note or invoice (as appropriate) which shows the invoice number and the date the invoice was raised, all relevant Customer and Supplier reference numbers, the type and quantity of the Goods (including the code number of the Goods, where applicable), special storage instructions (if any) and, if the Goods are being delivered by installments, the outstanding balance of Goods remaining to be delivered; and

(b) if the Supplier requires the Customer to return any packaging materials to the Supplier, that fact is clearly stated on the despatch note. The Customer shall make any such packaging materials available for collection at such times as the Supplier shall reasonably request. Returns of packaging materials shall be at the Supplier's expense.

The Customer agrees and acknowledges that any dates quoted for delivery are approximate only, and the time of delivery is not of the essence. The Supplier shall not be liable for any delay in delivery that is caused by a Force Majeure Event or the Customer's failure to provide the Supplier with adequate delivery instructions or any other instructions that are relevant to the supply of the Goods.

6.4 Any special delivery requirements or difficulties in delivering (e.g. narrow doorways, stairs, restricted access) should be made known to the Supplier at the time of placing the Order and may be subject to additional costs. 6.7 If the Customer fails to accept delivery of the Goods in accordance with Clause 6.5, then except where such failure or delay is caused by a Force Majeure Event or the Supplier's failure to comply with its obligations under the Contract in respect of the Goods, the Supplier shall store the Goods until delivery takes place, and charge the Customer for all related costs and expenses (including insurance). Such charge to be equal to 15% of the value of the order.

6.8 If 14 Business Days after the day on which the Supplier notified the Customer that the Goods were ready for delivery, the Customer has not accepted or taken delivery of them, the Supplier may resell or otherwise dispose of part or all of the Goods and recover its reasonable storage and selling costs in respect of the Goods and:

(a) Where the Customer has paid for the Goods in full, account to the Customer for any excess sums recovered over the price of the Goods and such storage and selling costs; or

(b) Where there are insufficient funds to cover the storage or selling costs or where the Customer has not yet paid for the Goods in full, charge the Customer for any shortfall below the price of the Goods to cover such costs.

6.9 The Customer shall not be entitled to reject the Goods if the Supplier delivers up to and including 10% less than the quantity of Goods ordered, but a pro rata adjustment shall be made to the [Order invoice] on receipt of notice from the Customer that the wrong quantity of Goods was delivered.

6.10 The Supplier may deliver the Goods by installments, which shall be invoiced and paid for separately. References in these Conditions to delivery of the Goods shall, where applicable, be read as to include reference to delivery of the Goods by installments. Each installment shall constitute a separate Contract and any delay in delivery or defect in an installment shall not entitle the Customer to cancel any other installment.

No single or partial exercise of such right or remedy shall preclude or restrict the further exercise of that or any other right or remedy.

KITCHEN DOOR CARE INSTRUCTIONS

Important:
Please ensure the end user has a copy of this door care guide.

END USER CARE INSTRUCTIONS

CLEANING
We recommend the following door cleaning instructions for all of our doors:

- Clean the doors using only a solution of 95% lukewarm water with no more than 5% soap
- **Do not** spray anything onto your doors – this includes the solution recommended above
- Use a clean damp (not wet) cloth
- Dry with a soft clean cloth. If it is a timber door run the cloth along the grain direction
- Any cooking marks must be wiped immediately
- **Do not** allow liquids to seep into joints of doors, wipe any spillages immediately

Do not use any of the products listed below to clean the door as it may mark and damage the surface:

- Wax furniture polish
- Bleach/chlorine based cleaning products
- Abrasive cleaners
- Solvents
- Multi-purpose cleaners
- Alcohol based cleaners
- Ammonia or any other similar product
- Scouring pads or abrasive cloths

Environmental Information
Please be aware that localised or intense heat/steam can damage fascias, subsequently the use of small appliances such as kettles, toasters etc. in close proximity to your kitchen fascias should be avoided. Doors should not be exposed to extreme temperature changes. Due to their manufacturing process vinyl doors must not be exposed to temperatures above 70º C as this may cause damage to the door's surface.

INSTALLER CARE INSTRUCTIONS

INSTALLER CARE INSTRUCTIONS
Before commencing any work on doors or accessories, i.e. hinge boring, handle installation, cutting etc. please inspect the product thoroughly, making sure it meets your requirements for colour consistency and that it is free from scratches or blemishes. Once the product has been altered in any way from the state it was supplied it cannot be replaced.

CARE WHEN FITTING
Always handle doors/drawers with care to avoid damage. When fitting hinges and handles to doors/drawers please ensure doors are placed on a clean and smooth cushioned surface to avoid scratches to the product.

FOIL/VINYL/OVER LACQUERED DOORS
Some doors may have a protective film on the face. Direct exposure to sunlight may cause an adverse effect therefore it is recommended you remove this film as soon as possible after fitting. Due to their manufacturing process vinyl doors must not be exposed to temperatures above 70º C as this may cause damage to the door's surface.

TIMBER/VENEER/HAND PAINTED DOORS
Timber is a natural product; therefore colour, grain structure and features will differ from door to door. Raw timber doors must be treated before use.

Timber and veneer doors have a unique and natural characteristic and because of this colours may change over time when exposed to sunlight. Please be aware of this natural colour change when ordering additional doors to suit a previous install. We also recommend you change your timber door samples every six months due to this reason.

Timber can be prone to expansion and shrinkage based upon the environment which it is installed in. Timber and veneered doors are affected by moisture; if there is too much moisture in the environment it can have an adverse effect on the door over a period of time and it may lead to timber expanding, especially during winter periods. Excess moisture may also be found in new builds and properties where renovation work has been carried out; examples include plastering or floor screeding, etc. In the summer months when the environment is drier, shrinkage may occur in the timber.

This natural movement of timber may cause the surface finish of the timber/veneered door (i.e. painted, varnished, lacquered finishes, etc) to move with the timber. If this occurs then there is a chance that it may result in shrinkage and hairline cracks appearing on the door.

Please check the moisture content of a room before installing timber or veneer doors. The above also applies to hand painted doors.

ENVIRONMENTAL INFORMATION
Newly plastered rooms, plaster repairs, floor screeding, renovations, etc should be left to dry out thoroughly before installation of doors, whatever their material. When fitting doors adjacent to an oven, a suitable heat shield must be used.

DOOR COLOUR AND UV LIGHT
Any door range, whether it be over lacquered, vinyl wrapped or painted will change colour over time due to natural UV exposure. Please be aware of this natural occurrence if replacing doors previously installed.

DOOR STORAGE
Doors should be stored on a stable flat stillage in a horizontal position. Please ensure doors are placed in a cool and dry area.
